WEEKLY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF AURORA, TO THE VISIONARY SISTER LUCÍA DE JESÚS

To transform the human condition, it is necessary to know it profoundly.

Since its creation, children, since you arrived on Earth with veils covering your eyes, your consciences, humanity got used to live one illusion after the other, and not only ignored its past and future, but also believed to be something it was not.

Because of the present planetary situation of chaos and perdition, not finding a meaning for their own lives, many search for the truth, and the unbridled thirst makes them drink of the water from any fountain that may show up as if it were the purest and most crystalline of all.

You must take care, children, of the water you drink, of the knowledge you search for, because all waters can satiate the thirst of who was dry in spirit, but if you continue drinking of water contaminated by the power and human vanity, you might end up dying in spirit, diagnosed by ignorance, when you believed having found the truth.

Drink of the water that God sends you through His Messengers and trust that it has all you need. The one who drinks of two fountains - sinning by the desire for power and possession of new knowledge - might drown in their anxiety.

Drink of the water that washes, transforms and purifies you and not of the water that makes you greater and brings vanity to your souls, confusing them.

True knowledge nourishes the consciousness and matures the spirit and not the personality. I also tell you that often an instruction will come from God that you will understand with the soul, not with the mind. Even so, even if it is incomprehensible to you at this moment, it will transform you and lead you to new steps, in which one day you will be able to understand what has gotten you there.

Drink from the fountain of love, of sacrifice, of service, of prayer. In it you will find all sciences.

Your Father and Friend,

The Most Chaste Saint Joseph
