DAILY MESSAGE OF MARY, MOTHER OF THE DIVINE CONCEPTION OF THE TRINITY, TRANSMITTED TO THE VISIONARY FRIAR ELÍAS DEL SAGRADO CORAZÓN

Be like children and come to Me because I will protect you.

Dear children,

Today I invite you to contemplate My Immaculate Heart. I want to teach you to live in the humility of life so that your hearts may strengthen themselves day by day.

I want to tell you, My little ones, that we must pray for the world and for all the souls that lack the true humility of the heart. If you, dear children, pray with the soul and with the heart you will be able to help so that Our Father may pour His Love and His Mercy over this chaotic world without peace.

For this reason, little ones, I come as the Queen Messenger of Peace. I come to teach you how you must act with your hearts before life. I want that, from My Heart, you may go through My servant life as Mary, the Mother of Jesus, so that you may keep the glorious moments that My Son offered to all the souls through the episodes of each parable. Each one of them will help you to meditate with the heart about the Love in the words of Christ. For this reason I invite you to recover what they have always, from the time that you were children, taught you about the real life of each Gospel. United thus in prayer, souls will be able to reencounter a path of true communion with Christ. You will be together with Me, bringing the spirit of the reading back to life in the hearts that must learn to love on each new day.

Dear children, keep My words in your hearts so that they may grow like the flowers in each dawn. The Lord calls you to reconcile yourselves with the teachings that Christ dictated to humanity.

My little ones, I will accompany you through this new path- way of prayer and communion with My blessed and merciful Son. If you open your hearts to the call that comes from the Heavens it will be the sign that more lost souls will be able to reconcile with My Immaculate Heart.

Who guides you with Divine Love,

Mary, Mother of the Divine Conception of the Trinity
