DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED DURING THE JOURNEY FROM THE CITY OF FATIMA, PORTUGAL, TO PALERMO, ITALY, TO THE VISIONARY SISTER LUCÍA DE JESÚS

When God requests a mission from humanity, He measures not only its possibilities of fulfilling it, but also the urgency of the times and the days, urgency for souls to awaken and receive an opportunity of redemption; urgency for nations to be relieved of the darkness that surrounds them so that, as a people, they can comply with their part in the evolution of the planet.

In this time, children, God the Creator will ask you to fulfill His Plan based on your absolute surrender, sacrifice and love, because in spite of the crisis that exists on the material levels of the planet, much greater is the spiritual and planetary crisis, which is the one that defines the destiny of souls, of humanity as a race, and of the planet as Divine Creation.

Once and again, We ask you to elevate your consciousnesses so that you may understand why and what you are in this world for. There is a greater evolution to be lived, more than an instruction, more than an experience.

Superior life should no longer be mysterious for the disciples of Christ. The instruction you have received must start to live within your consciousnesses, because only in this way will you know how to wisely deal with the difficulties of life and to measure your priorities, not by human survival, but by universal evolution.

I know what I tell you may be incomprehensible at this moment, but meditate on My words and ask the Father for the Grace of not only knowing His Truth, but also of experiencing It and expressing It while there is time.

There will be no more life to sustain, there will be no more planet to save if souls do not liberate themselves from indifference and embrace divine purpose. Therefore, pray, serve and deepen each day in the awakening of your consciousnesses. Thus, you will be able to fulfill what you have come to fulfill in this world.

Your Father and Friend,

The Most Chaste Saint Joseph
