**DAILY MESSAGE OF MARY, ROSE OF PEACE, TRANSMITTED IN THE LOCALITY OF GOVERNADOR CELSO RAMOS, SANTA CATARINA, BRAZIL, TO THE VISIONARY FRIAR ELÍAS DEL SAGRADO CORAZÓN DE JESÚS**

Sacred Oceans - Part I

In the deep seas of the planet, and in places close to the continents of the Earth, spiritual life projects itself as a counterpart of material life.

Thus, a communication among different states of consciousnesses is established so that the greatest possible amount of attributes may descend to the world from the nonmaterial Source.

The sacred oceans of the planet that today, that are neither respected nor loved, fulfill a very important task in the inner and emotional balance of humanity.

At the same time, the sacred oceans of the Earth save and protect, through ocean currents, all the material and especially spiritual life that is to be found in them.

The sacred oceans, within the creation of the Material Universe, constitute one of the fundamental material and spiritual resources for human evolution as the oceans act not only as axes of inner balance but also, due to the diversity of their waters, they act as one of the greatest natural mirrors within the local Universe.

These natural mirrors serve as physical receptacles to protect and save the intelligent activity of the non-material Mirrors, called great power plants of spiritual light, which radiate and emanate, towards humanity, all the divine attributes of Creation.

This specific network of Mirrors, which is to be found in the great oceans, receive the impulses of light of the Mirrors of the Cosmos, which, being intermediaries between Heaven and Earth, contributes to the expansion of consciousness and the awakening of inner senses, that today are asleep within humanity.

The sacred oceans help in the concentration of a very high spiritual energy, which, descending from the Spiritual Universe, acts through the Mirrors of the oceans, contributing with harmony, balance and peace, within the consciousness of humanity.

The restrictions that these potent Mirrors of the oceans have today are due to the invasion, destruction and manipulation that the human being produces in all sea life and to the uncontrolled contamination of seas, as well as to the exploitation of the marine corals, which fulfill the mission of keeping the balance of the Earth's axis.

For this reason, and for this time of purification, the approximation of nonmaterial Mirrors to the oceans allows the counteraction of imbalances that the human race generates, but it does not solve them.

This is how the sacred oceans, receptacles of the Mirrors, serve as support for the intelligent and silent task of the nonmaterial Mirrors so that humanity may awaken and recover the interest in the care and protection of a biodiversity that is also spiritual.

If more human beings assumed the care and respect for the oceans, the great mirrors of water would cease to act promoting natural disasters and great purifications of the human race.

I thank you for responding to My call!

Who blesses you,

Your Mother Mary, Rose of Peace
